Object Oriented Programming, Agile Software Development, Continuous Integration, Responsive Design, Command Lines, UX/UI Integration, Domain Name System

## Project Examples

**Expensify:** Allows users to create accounts and log private information about their personal expenses. With filters and summary logs, this application assists users in staying up to date on their spending and prevent over spending.

**Site:** <https://curtis-stone-expensify.herokuapp.com/> **Code:** <https://github.com/curtis-stone/Curtis-Expensify-App>

- React, JavaScript, Node, Sass, and Firebase
- UX Landing Pages, User/Database Authorization, Redux Store, 3rd Party Date Selectors, and Application-Wide Testing with Jest

**Recipe Book:** Allows users to create accounts and store recipes in a secure online recipe book application. Uses complex JavaScript in the bulk of its performance, such as user authorization, database requests, security encryptions, and client-side routing.

**Site:** <https://recipebook-f84d8.web.app/> **Code:** <https://github.com/curtis-stone/Recipe-Book>

- Angular, JavaScript, TypeScript, Redux, Node, CSS, and Firebase
- UX Landing Pages, User/Database Authorization, Database Requests, Form Submission, Security Encryptions, Client-Side Routing, and Application-Wide testing with Jasmine and Karma

**6Percent Fitness:** Web application for 6Percent Fitness clients. Features 200+ exercise tutorials, health informational pages, and shop for workout programs and guides. PayPal REST API used for payment transactions and ordering logs. Responsive UI for both desktop and mobile friendly viewing.

**Sites:** <https://6percentfitness.com/> | <https://ab-generator-1.web.app/home>

- React, JavaScript, Node, Sass, Express, and PayPal API. Testing capabilities with Jest
- User Experience Design, and Responsive User Interface Design Patterns
